

EU-TYPE EXAMINATION CERTIFICATE

Issued by Liftinstituut B.V.
identification number Notified Body 0400,
commissioned by Decree no. 2018-0000125182

Certificate no. : NL19-400-1002-100-08 Revision no.: -

Description of the product : Progressive safety gear for machined guide rails with lubricated surface; up or down

Trademark, type : Cobianchi, PC250E / PC250U

Name and address of the manufacturer : Cobianchi Lifteile AG
Weststrasse 16
CH-3672 Oberdiessbach, Switzerland

Name and address of the certificate holder : Cobianchi Lifteile AG
Weststrasse 16
CH-3672 Oberdiessbach, Switzerland

Certificate issued on the following requirements : Lifts Directive 2014/33/EU

Certificate based on the following standard : EN 81-20:2014
EN 81-50:2014

Test laboratory : None

Date and number of the laboratory report : None

Date of EU-type examination : August 2019

Additional document with this certificate : Annex belonging to the EU-type examination certificate no.: NL19-400-1002-100-08

Additional remarks : See annex

Conclusion : The safety component meets the requirements of the Lifts Directive 2014/33/EU taking into account any additional remarks mentioned above.

Amsterdam

Date : 08-10-2019
Valid until : 08-10-2024

ing. P.J. Peeters
Manager

Certification decision by

Annex of EU-type examination certificate NL19-400-1002-100-08

Date of original certificate : October 8th, 2019
 Revision number / date : - / -
 Project number : P190257

1. Description

1.1 General:

maximum tripping speed	: 2.63 m/s
guide rails	: Machined
guide rail thickness	: 15,88 – 31,75 mm
minimum gripping width on guide rail	: 40 mm
lubrication means (oil) of quality	: HLP-oils, (DIN 51524, Part 2)

1.2 Permissible total mass for safety gear operation:

Guide rail surface	min. – max. total mass
Oiled machined guide rails	: 8300 – 25000 kg

1.3 Brake force allowed for ascending car overspeed protection:

Guide rail surface	min. – max. brake force
Oiled machined guide rails	: 132800 – 400000 N

2. Conditions

Additional to, or in deviation of the applicable demands in the considered requirements / standards (see certificate and/or page 1 of this report), the following conditions shall be taken into account:

- The safety gear and/or ascending safety device shall be adjusted according the specific load graphs related to μ -factor, bending of the housing and spring compression.
- The safety gear shall be activated by an overspeed governor fulfilling the requirements of EN 81-20 § 5.6.2.2.1 (e.g. max. nominal speed 2.0 m/s).
- The mass stated may differ 7.5% from the mass adjustment (EN 81-50 § 5.3.4).
- The braking force for the lift shall be adjusted in such a way that it will not allow a retardation of the empty car up in excess of 1 g_n during the stopping phase.
- In case of upward braking it must be assured that the construction of the guide rails is capable to withstand the forces applied.
- The maintenance instructions shall be provided with the safety component.
- The safety gear can be used as stopping element as part of a protection means against unintended car movement.
 - The safety gear and overspeed governor combination shall ensure that the values required by EN 81-20 § 5.6.7.5 are not exceeded.
 - The operation distance of the safety gear is 53 mm maximum and the maximum tripping speed is 2.0 m/s.

- These values shall be verified by the installer of the complete lift.
- The safety gear will activate even with very low speeds.
- The safety gear can be adopted for the use on EN 81-77:2018 compliant lifts, to comply with § 5.4.2 of the EN 81-77:2018 the safety gear is fitted with a retainer on each housing to prevent accidental tripping.

3. Conclusions

Based upon the results of the EU-type examination Liftinstituut B.V. issues an EU-type examination certificate.

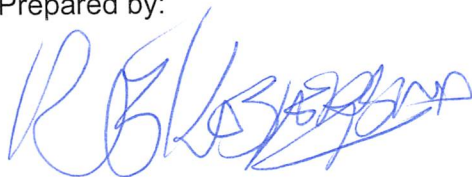

The EU-type examination certificate is only valid for products which are in conformity with the same specifications as the type certified product. The EU-type examination certificate is issued based on the requirements that are valid at the date of issue. In case of changes of the product specifications, changes in the requirements or changes in the state of the art, the certificate holder shall request Liftinstituut B.V. to reconsider the validity of the EU-type examination certificate.

4. CE marking and EU Declaration of conformity

Every product that is placed on the market in complete conformity with the examined type must be provided with a CE marking according to art. 18 of the Lift directive 2014/33/EU under consideration that conformity with eventually other applicable Directives is proven. Also every product must be accompanied by an EU declaration of conformity according to annex II of the Directive in which the name, address and the Notified Body identification number of Liftinstituut B.V. shall be included as well as the number of the EU type-examination certificate.

An EU-type certified safety component shall be random checked, for example according to annex IX of the Lift directive 2014/33/EU before these safety components may be CE-marked and may be placed on the market. For further information on random checking by Liftinstituut, see regulation 2.0.1 'Regulations for product certification' on www.liftinstituut.com.
